

Central Pins Faith in Veterans---Many Play Three Years---Bowie Track Fast

CENTRAL HIGH HAS MANY VETERANS IN BASEBALL TRAINING

Team Has Been Playing for Three Years, and Is Expected to Come Through.

GONZAGA TEAM NOT BEATEN

Players Under Faculty Ban, and Suits Have Been Turned In As Season Is Closed.

By BRYAN MORSE.

Central High School baseball players, under the leadership of Capt. "Ike" Macdonald, hard at work for the past week with Gould Menefee as coach, have already annexed their first contest of the season and are ready to come through the campaign with as good prospects as any of the other high schools in the city.

The Central players are making no claims to the title, but their activity is demonstrating daily that they can be counted upon to produce the goods this year. With the exception of the catchers, Central's nine is a veteran one in every sense of the word. The players have been together for nearly three years and are looked upon as sure to come through.

Two newcomers at Central, Lee Hart and Joe McFall, are being groomed by Coach Menefee for the catching job. There is a wealth of material among the pitchers as Cox, Gottlieb, "Doc" White, Kelly and Dally are on the mound every day.

Captain "Ike" Macdonald leads the candidates for first base although winding and Donovan are out for the position. On second Central is trying out "Buddy" Heicher and a youngster named Marbury, who earned quite a reputation at Epiphany in basketball during the winter.

Hartshorn, a veteran of two years ago, and "Randy" Belcher, another veteran, are scrapping away for the shortstop position. Seldon and Cassell are on the hot corner. Seldon is another Epiphany basketball player.

The Central outfield will be picked from "Mollie" Roberts, brother of "Jake" Roberts, the Tech baseball captain; Chapin, a veteran of two years ago, and Molster and Foster, whose names sound like two of the National players. "Jake" Macdonald, brother of the captain, is another trying for the outfield. He is the fifth member of the team to try for Central baseball teams and if he shows as much stuff as any of his brothers he is sure to land.

Central has gained a decision over the Gallaudet College players already, winning handsily from Jimmy Fricke's aggregation in a practice game. In Walter Cox the team has a seasoned pitcher. Gottlieb is another hurler who can be counted upon. "Doc" White, who played in the outfield last season, is being made into a pitcher so that the hurling end of it will be well taken care of.

The Preparatory Basketball League championship cup, given by Georgetown University and won outright by Gonzaga repousses today in Spaulding's window. John O'Reilly, president of the circuit, will award the cup to the Gonzaga boys toward the end of the week.

Authoritative announcement comes from Gonzaga today that it has formally closed its season, called to three forms, and that the game supposed to have been played by Gonzaga against the Empire A. C. last night was not played. Two of the boys playing on the five purported to be Gonzaga are under the faculty ban. Several of the Gonzaga players have played on a team called the Ramblers, and it is thought that the mistake was made, as several of the Gonzaga boys are on the team opposing the Empire A. C. five.

Earl Fuller, of the Y. M. C. A., nominated to umpire the Business-Western game on Friday, does not care to work in the final battle. Business and Western have agreed upon "Short" Hughes, who will be prevailed upon to take up the umpiring end of the game.

Tech will tackle the Georgetown University team on the Hilltop today in an effort to show the colleges that a high school can play a classy game of baseball. Harry Collinsworth has had the Tech team well under way, and is expecting them to give a good account of themselves. Snyder, Hurd, and Stowers will probably be given a chance to work against the college players.

Business has called off its game with the Columbia Theater nine for tomorrow as many of the baseball candidates are still working in basketball. All three Wise boys playing on the basketball team are in on about six games this season. Ray Wise, captain of the basketball, is the leader of the baseball nine as well.

Word comes from Baltimore today that eleven Washington schoolboys are entered for the scholastic swimming championships to be held at the B. A. C. tank Saturday. Latrobe Goswell says the meet will be the biggest ever. Prominent among the Washington swimmers are Zerbe, Hunt, and Francis of the Army and Navy Preparatory School.

Arrange Preliminaries For Ardmore Carnival

Preliminaries are being arranged today for the various bouts in the Ardmore carnival set for Thursday night, when Danny Ferguson and Frankie Nelson meet in the big bout. Pat O'Connor, the local referee, has been agreed upon as the third man in the ring by both boxers.

Kid Greek and "Buck" Taylor, of Baltimore, will meet in the semi-final bout. Kid Jefferson and Billy Smith, both of this city, will go on for a four-round bout, while Battling Terry Jones will be hooked up with some fast boy in another bout. A battle royal is also on the card.

Webster Wins.

Sixth grade, at Webster School, defeated a team composed of the Sixth and Seventh grades of the Thomas School yesterday, 15 to 12.

GLIMPSE OF TRAINING AT CHARLOTTESVILLE CAMP

Here are BILLY LAMAR, outfielder, and OSCAR RUSSELL, pitcher, who are ambitious to stick to Griff's band of athletes.

NO PITCHERS COME FORWARD FOR AGGIES

M. A. C. Team Lacks Veteran Hurlers, and Coach Byrd Is Up Against Stiff Proposition.

The Maryland Aggies are up against the real thing in baseball this season for having looked over all the candidates, not a single veteran pitcher is found in the ranks. Sixteen games have been scheduled with some of the leading college teams in the country, and to date nothing like a first rate pitcher has been found among the Aggies.

Coach Byrd is up against a stiff proposition. The team wants another year and hopes to win the State championship again. Valuable experience is needed by the hurlers at M. A. C., and many practice games will probably be booked with Washington teams in order to give the hurlers their chance.

The schedule, including the Harvard game, follows:

March 24, Catholic University, Brookland.

April 1 and 2, Cornell; 5, William and Mary; 10, Johns Hopkins; Baltimore; 12, West Virginia; 17, Gallaudet; Kendall Green; 19, Harvard; 29, Tufts; 31, Baltimore Poly; 24, Mount St. Joseph; Baltimore; 30, Dickinson.

May 8, St. John's; Annapolis; 15, Gallaudet; 19, Rock Hill; 22, Western Maryland; Westminster; 28, Washington; 29, St. John's.

Soldiers Will Receive Their Prizes at Meeting

Fort Myer soldiers, members of the various athletic teams at the post, will be gathered together today for an annual meeting at which Col. Wilbur Wilder Warner will award the various prizes won in competition during the winter.

Officers of Third Field Artillery, who won both the bowling and basketball championships, will come in for the greatest honor. Cups will be given the second and third teams, while pennants will also be awarded.

Entry Blanks Are Out For Pimlico Meeting

Entry blanks are out for two of the stakes that are to be run at the Pimlico meeting of the Maryland Jockey Club in May. These are the Preakness and the Champagne Memorial Cup. The Preakness is one of the truly old American stakes. It is a mile and furlongs for three-year-olds, and the roster of its winners carries the name of many a turf hero.

The Champagne Memorial is a two-year-old fixture, and is something of a family affair, for the reason that only those are eligible that were the product of mares in Maryland, Virginia, and Pennsylvania.

Professors Discuss Football in Secret

NEW YORK, March 16.—The committee of six Columbia College professors appointed by President Butler to make a football report to the university committee met in secret session in Hamilton Hall yesterday afternoon. Several of them were asked later whether the report was favorable or unfavorable, but all refused to comment on the brief, saying the facts would be made public in due time.

Kilbane's Manager Is Confident of Knockout

PHILADELPHIA, March 16.—Champion Johnny Kilbane and Kid Williams will not be making touches to their training today for their tilt tomorrow night at the Olympia. Both boys are pronounced as fit as the proverbial fiddle.

Williams is working with only one object in view, and that is to top the Cleveland champion. The featherweight crown to the one he already wears, Johnny Dunn, manager for Kilbane, is confident his protégé will defeat the Baltimorean via the knockout.

THREE ELEVEN'S MAY SUPPORT NEW YORK

Should Columbia Be Granted Football, Gotham Will Be Bright Sport Card.

NEW YORK, March 17.—With the prospects of Columbia restoring football bright, with Fordham taking up rowing, and marked activity in the various branches of sport at New York University, the three big New York institutions promise to furnish New Yorkers with plenty of athletic contests in the future that will be well worth while seeing.

Not since the days when Columbia had a football team that ranked favorably with the best in the country has New York been represented by such a strong eleven, although a few years ago Fordham and New York University, particularly the former, did much to put New York on the gridiron map.

Then Fordham dropped out of football for a time and when N. Y. U. star team was practically wiped out by graduation in a single year, the stock of both institutions took a big drop in the football market. Last year Fordham and N. Y. U. were more successful, and their prospects are bright for next fall. If Columbia takes up the sport this year there will be plenty of local interest in the gridiron game.

Fordham is gradually mapping out a pretentious athletic program. The Bronx institution has taken up rowing and hopes to take a prominent place in the sport before long. Several attempts have been made since then to revive rowing at University Heights, but they have failed.

N. Y. U. will devote its efforts this fall to building up a good football team. Last season was the first that a graduate coach directed the New York football policy, and the college authorities were satisfied enough with the showing of the team to decide on a continuation of the graduate coaching system.

BOWIE TRACK FOUND FAST IN PRACTICE

Dr. J. F. Tyree's Horses Go Over Maryland Course in Speedy Fashion.

That the Bowie track is remarkably fast for a new one is evident by the workouts of the thoroughbreds from the barn of Dr. J. F. Tyree, the wealthy chemist. Quarters in '24, and halves in better than 46 have been reeled off with utmost ease by the representatives of the Capital City turfman, who will have a very formidable stable to race during the spring meeting of the Maryland Agricultural Association, which is to open on April 1 and continue for twelve days.

While Dr. Tyree's string is comprised of feet-footed equines, he seems to think most of Carbine, a three-year-old, which he has expressed his willingness to match against any performer of a like age for any amount of money. In his work Carbine is reported to have shown more than anything in the Washington stable, and if he doesn't prove one of the best three-year-olds of 1915 Dr. Tyree will be a sadly disappointed individual. Carbine, with Protector and a colt by Sea King-Toots, will be taken to New York by the Maryland Club, the conclusion of the spring racing in Maryland, while the rest of the establishment, which comprises Dr. Larriek, Herbert Temple, Celestity, Cello, and Gloomer, will be campaigned in Canada by Dr. Larriek, who was in charge of the horses of another owner, the late Dr. Kinney, at the Fair Grounds, New Orleans.

J. S. Hackett has written from Juarez, Mexico, for eight stalls during the coming meeting at Bowie and among those he will send to the post will be the champion, formerly owned by Col. Raj Parr, the local turfman. Executor has landed two stakes at the Mexican track this winter, these being the San Lorenzo and Guadalupe. In the latter the bay gelding by Fatherless-Newark, which was bred at William Curtis' Ingleside farm, at Charlottesville, stepped a mile in 1:38 flat, defeating Bo, Nannie McLee and Claribel, while in the Guadalupe, at the same distance, he took the measure of Transact, Christopherine and Ringling.

It is not necessary, under the system instituted and pursued at the Kin-Po Institute, 1700 L street northwest, to devote weeks or even days to the task of overcoming all desire or craving for stimulants, drugs, or tobacco. The psychological effects of a speedy treatment, harmless, and efficacious, are far and away ahead of the psychological effects obtained from a month or a year's confinement. The harmlessness of the treatment is a physical, and it is the only after effect, and the patients are almost at once ready and anxious to resume their usual occupations. Food is the only after treatment. All that medicine can do is to assist nature in the removal of the poisons, and it is proved by the fact that there are no bad after effects, and the patients are almost at once ready and anxious to resume their usual occupations. Food is the only after treatment. All that medicine can do is to assist nature in the removal of the poisons, and it is proved by the fact that there are no bad after effects, and the patients are almost at once ready and anxious to resume their usual occupations. Food is the only after treatment. All that medicine can do is to assist nature in the removal of the poisons, and it is proved by the fact that there are no bad after effects, and the patients are almost at once ready and anxious to resume their usual occupations. Food is the only after treatment.
